

Satellite Radio is my constant companion in the Truck that I drive for a living, and the weather & traffic updates are an invaluable service to me. It helps me decide which route to take when passing thru some of the large cities. I also like their lineup of stations, that never fade in the middle of my favorite song. I pay for this service and feel that nobody should be meddling in it. I especially like my Discovery Channel, and the old time radio programs. That is unavailable to me on regular radio. In fact, I have cancelled my TV subscription at home and am perfectly happy with my satellite radio for entertainment when I am home. The am/fm radio in my truck doesn't work very well and I'm without a station a lot of the time. Leave well enough alone please, XM Radio is a great service, and I'm willing to pay for it. Thanks for letting me speak.
